GIF Displayers

Three programs for displaying GIF images are included:

Giffer	for	Macintosh
Lview	for	PC
xloadimage	for	UNIX (e.g., Sun SPARC).

Silicon Graphics Inc. (SGI) machines may contain routines (fromgif and imgworks) to convert from GIF to SGI format and then display the SGI formatted image on the screen.

Examples

The following graphics examples were produced with the ERBE data on this CD.
