INFO ON DELIVERED IMAGERY IDENTIFICATION AND PROCESSED FLIGHT LINES

The table below shows the correspondence between the identification of the flight lines as reported in the Flight Campaign Reports and the resulting images delivered after raw data processing.

DATE (yymmdd)	FLIGHT	SURVEY	LINE ID.	TIME (UTC)	SENSOR	IMAGE ID.	DELIVERY
120725	D01	D01-1	AHS + CASI P11	8:43	AHS	0843Z_P11BD	Near real time
					CASI	0843Z_P11SF	
			AHS + CASI P01	8:51	AHS	0851Z_P01BD	
					CASI	0851Z_P01SF	
		D01-2	AHS + CASI P01	9:02	AHS	0902Z_P01ID	
					CASI	0902Z_P01E2	
			AHS + CASI P02	9:11	AHS	0910Z_P02ID	
					CASI	0911Z_P02E2	
			AHS + CASI P03	9:19	AHS	0919Z_P03I1	
					CASI	0919Z_P03E2	
			AHS + CASI P03	9:28	AHS	0928Z_P03I2	
					CASI	0928Z_PR3E2	
			AHS + CASI P21	9:46	AHS	0946Z_P21ID	
					CASI	0946Z_P21E2	
			AHS + CASI P22	9:38	AHS	0938Z_P22ID	
					CASI	0938Z_P22E2	
	N01	N01-1	AHS P11	21:32	AHS	NA[1]	
			AHS P11	22:01	AHS	2201Z_P11B3	
			AHS P01	22:10	AHS	2210Z_P01B2

					CASI	0940Z_P01E2	

---

[1] **NA**: Not Available

Fields **DATE**, **FLIGHT**, **SURVEY**, **LINE ID**. and **TIME (UTC)** obey to the naming scheme and information reported in the Flight Campaign Reports. Note that since consolidated versions of these reports have still not been delivered, these fields may vary slightly. Nonetheless the information provided is accurate enough to match the image products to the corresponding flight line.

Field **IMAGE ID**. indicates the strings "TIME_LINE" of every processed flight line in the image naming pattern:

SENSOR_DATE_TIME_LINE_LEVEL_otherinfo.

Near real time **DELIVERY** means processing and delivery was completed right after acquisition, during the REFLEX training course, while *Nominal* **DELIVERY** means imagery was processed in the INTA facilities, after the REFLEX training course and delivered subsequently.
